

Tokenomics for Solana Merchant Payments

Tokenomics for Solana Merchant Payments (SMP)

The SMP token is designed to provide real-world value by acting as a utility token exclusively within the Solana Merchant Payments ecosystem.

This tokenomics framework ensures sustainable growth, investor trust, and the long-term success of the project.

Total Supply

The total supply of SMP tokens is

1.0 billion

strategically capped to maintain scarcity and long-term value while preventing inflation.

Presale

30 %

Sold at \$0.005/token to raise \$1,500,000.

Locked Liquidity

35 %

Gradual release of 2.5%/quarter over 10 years.

Development

15 %

Funding platform scaling and enhancements.

Marketing

10 %

Flexible allocation for campaigns.

Team

5 %

Vested release of 2.5%/quarter over 10 years.

Reserve:

5 %

Held for contingencies or future needs.

Token Allocation

The token supply is distributed across key categories to ensure balanced growth, liquidity, and development.

Presale

30 %

300,000,000 tokens

Sold during the presale at **\$0.005 per token** to raise \$1,500,000

Use of funds:

65% for liquidity.
35% for development and marketing.

Investment limits:

Minimum: \$10 (2,000 tokens)
Maximum: \$1,000 (200,000 tokens)

Locked Liquidity

35 %

350,000,000 tokens

Ensures price stability and investor confidence.

Locked with a gradual release of **2.5% per quarter over 10 years.**

Development

15 %

150,000,000 tokens

Not locked to allow for strategic utilization post-launch.

Used for plugin customization, platform scaling, and ongoing enhancements.

Marketing

10 %

100,000,000 tokens

Supports campaigns to build awareness, drive adoption, and grow the community.

Not locked for flexibility in marketing efforts.

Team

5 %

50,000,000 tokens

Rewards the core team and advisors.

Gradual release of 2.5% per quarter over 10 years to signal long-term commitment.

Reserve

5 %

50,000,000 tokens

Held for contingencies or future opportunities, ensuring flexibility.

Presale Details

Price:

\$0.005/token

Investment Limits:

Minimum **\$10**
(2,000 tokens)

Maximum **\$1,000**
(200,000 tokens)

Allocation:

30% of the total supply
(300,000,000 tokens)

Goal:

Raise \$1,500,000 for liquidity, development, and marketing.

The presale is structured to build a strong, decentralized community of token holders and secure funding for project development.

Use of Presale Funds

- 65%** Locked liquidity to ensure price stability.
- 20%** Development for platform upgrades and new features.
- 15%** Marketing to drive adoption and growth.

Locking and Vesting Schedule

To build investor trust and ensure sustainability, a clear locking and vesting schedule is implemented.

Locked Liquidity Tokens:

Gradual release of 2.5% per quarter over 10 years

Team Allocation Tokens:

Follow the same release schedule of **2.5% per quarter over 10 years**

Circulating Supply at Launch

At launch, the circulating supply is designed to minimize inflation while ensuring sufficient tokens for utility and liquidity.

This approach limits the initial circulating supply to approximately **558,750,000 tokens**.

Presale Tokens:

300,000,000 tokens

Liquidity Tokens (Initial Release):

8,750,000 tokens
(2.5% of 350,000,000)

Development & Marketing Tokens:

250,000,000 tokens for immediate use post-launch.
